Fig. 7B

Fig. 7A

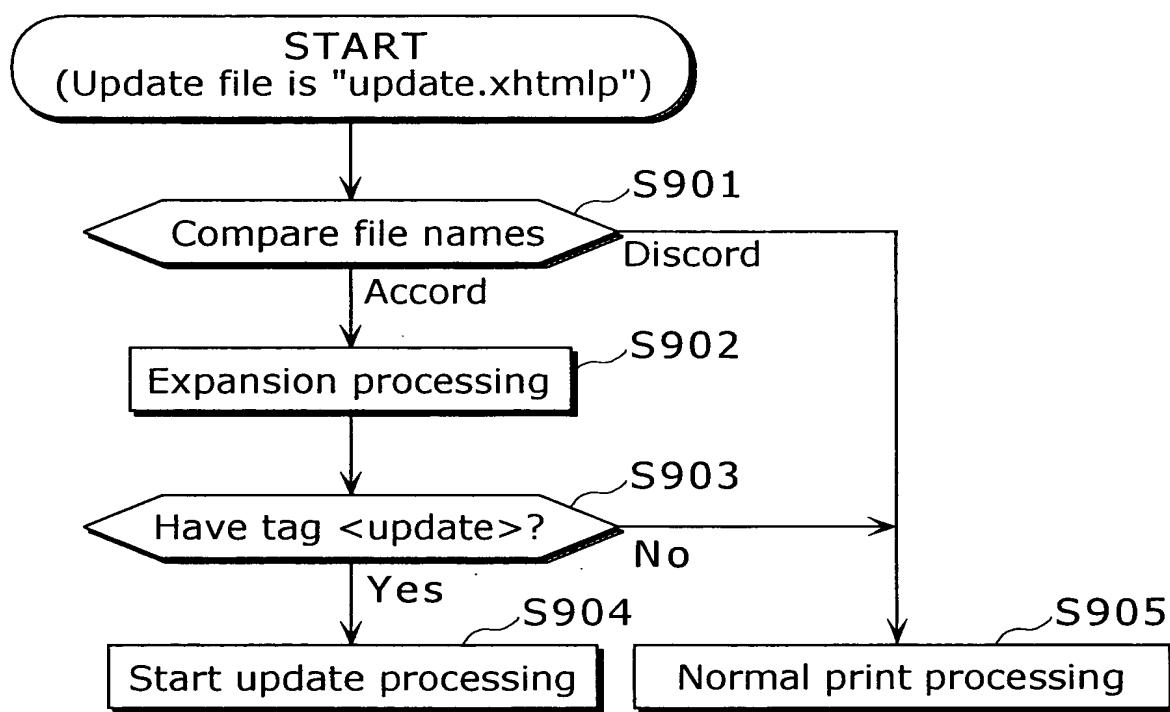

The diagram illustrates the connection between the 'update.bml' file and the 'Firmware update' button. A large bracket on the left side of the image groups the text 'update.bml' and 'display 710'. An arrow points from this bracket to a second bracket on the right side of the image, which groups the text 'Firmware update' and '711'. This visual connection indicates that the 'update.bml' file, when displayed on the printer, triggers the 'Firmware update' function, which then displays the number 711.
